

CANCER SUPPORT
COMMUNITY
GREATER CINCINNATI-
NORTHERN KENTUCKY

Community Is Stronger than Cancer.

ABOUT OUR MISSION

Cancer Support Community uplifts and strengthens people impacted by cancer by providing support, fostering compassionate communities, and breaking down barriers to care. Our impact speaks volumes. Last year alone, we served over 7,000 individuals and families, providing more than 12,000 program visits across our OH-KY-IN Tri-State region. But numbers only tell part of the story. It's the smiles, the renewed hope, and the sense of belonging that truly define our work.

THE NEED FOR CSC

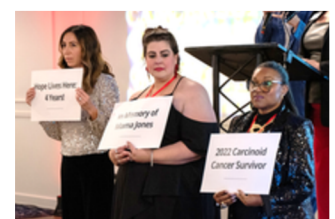

Each day, an estimated 60 people in our Tri-State region hear the words, "You have cancer." For many, that moment marks the beginning of an emotional, social, and financial crisis - not just a medical journey. National studies show that up to one in three people with cancer experience clinically significant anxiety or depression, yet fewer than half receive the mental health support they need to cope and stay engaged in treatment. Too often, people facing cancer feel isolated, overwhelmed, and unsure where to turn.

CSC exists to change that. We provide free, evidence-based, culturally responsive psychosocial care - support groups, navigation, education, and healthy lifestyle programs - for patients, survivors, and their loved ones. By surrounding each person with a community of support, CSC helps reduce distress, improve quality of life, and increase the likelihood that individuals can complete and benefit from their medical care.

STRONGER TOGETHER

Cancer Support Community delivers hope, healing, and connection to individuals and families navigating cancer throughout Greater Cincinnati, Northern Kentucky and Southeastern Indiana.

In 2026, we're inviting community-minded partners to join us - each event and program provides unique opportunities for visibility and engagement, from presenting sponsorships to hands-on volunteering. Your partnership as a sponsor helps ensure that no one in our region has to face cancer alone.
